Chapter 17.1: Version Control » (<https://plus.cs.aalt...>

CS-C2120 (https://plus.cs.aalto.fi/studio_2/k2022/) / Round 17 (https://plus.cs.aalto.fi/studio_2/k2022/w17/)
/ Project starts!

Project starts!

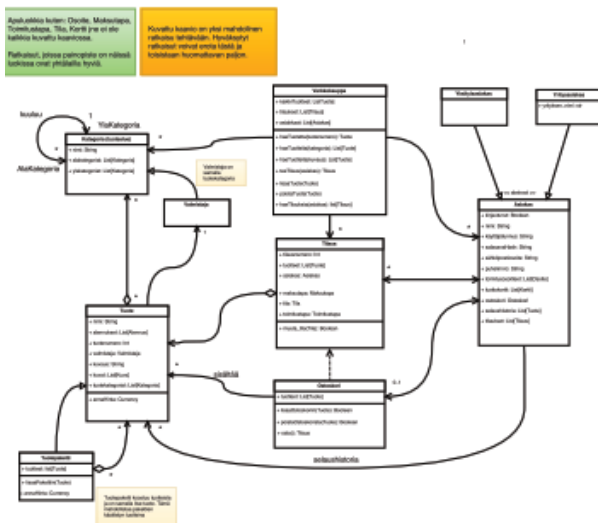

Project topics are published on 2.2 and the topic must be selected by 9.2. If you want to suggest your own topic, please contact Otto Seppälä by Feb 7th.

The project plan will be submitted in two phases. The General plan, which mainly adds details to the topic description is submitted by 14.2.2022. A more elaborated Technical plan is submitted by 18.2.2022. The plan submission is split to two parts to allow the student to first cover what the project does and a few days later cover a plan for implementing that behaviour.

PS. Thanks for careful readers who have note several typos in the course material.

UML model solution

Below there is one possible solution to the UML modeling task. The model has been created by the staff of courses Programming Studio 2 and Programming Y2. Note that this is only one possible approach to the problem. Many students were focused on quite a different set of classes or made different choices regarding class relationships and class divisions.

(https://gitmanager.cs.aalto.fi/static/studio2_k2022dev2-

[horrible-gitmanager-interface/_static/pics/Verkkokauppa_UML_solution_en.pdf](https://gitmanager.cs.aalto.fi/static/studio2_k2022dev2-horrible-gitmanager-interface/_static/pics/Verkkokauppa_UML_solution_en.pdf))

Figure: Model response to the UML modeling task

We encourage the reader to note the following aspects in the model:

- A ProductPackage consists of `Product`s and through inheritance, is itself also a `Product`. This allows managing `ProductPackage`s also as `Products`.
- The recursive relationship between categories
- How Manufacturer could be shown as a category (through inheritance). This is however a debatable design choice
- That arrows point to the superclass Customer and not the subclasses.

This is but one example of a model, yours might be different but equally good.

Feedback

Please note that this section must be completed individually. Even if you worked on this chapter with a pair, each of you should submit the form separately

 This course has been archived (Thursday, 1 June 2023, 12:00).

You cannot submit this assignment

Time spent: (*) Pakollinen Please estimate the total number of minutes you spent on this chapter (reading, assignments, etc.). You don't have to be exact, but if you can produce an estimate to within 15 minutes or half an hour, that would be great.
